### i4M Controller Powerup and Connection Issues

05.06.20

---

#### Symptoms

LED does not illuminate

LED light is intermittent

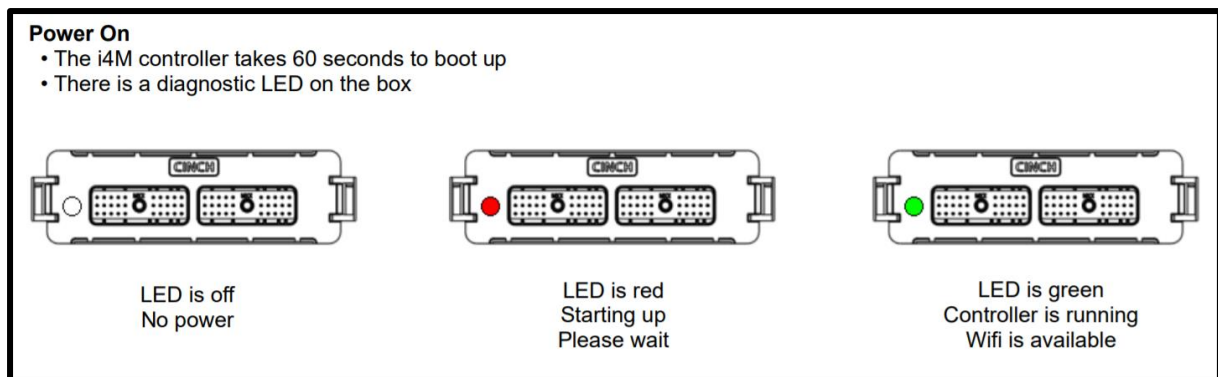

Device will not connect to WIFI

Connects to WIFI but can't change settings or use i4M app

LED light stays red

*\*LED diagnostic light is located on the underside of the controller as shown below\**

#### i4M VRT or MONITOR ONLY:

#### Notes

Ensure latest version of i4M app is installed

Ensure your device (Tablet, iPad) software is up to date

Ensure controller is receiving clean and constant 12V power

If LED light is stuck on red, contact the factory

**If your machine is equipped with an MDC Monitor controller, your 2 LED's will be red and blue as shown below**

#### MDC MONITOR CONTROLLER:
